

Leadership Beyond Borders: Global Vision & Management

Bridging Cultures, Orchestrating Success, and Managing Complexity.

Engineering is not executed in a vacuum; it requires coordination, adaptability, and vision. As the President of the Erasmus+ Club, I transformed a student organization into a hub of international mobility and professional development.

Strategic Project Management:

Led a diverse, cross-functional team to plan and execute large-scale cultural exchange events, overseeing logistics, budgeting, and stakeholder communication.

Mentorship & Crisis Resolution:

Acted as the primary point of contact for international students, resolving adaptation crises and navigating bureaucratic procedures, which honed my ability to make quick decisions under pressure.

Organizational Growth:

Implemented new engagement strategies that significantly increased active membership and fostered a sustainable, collaborative community culture on campus.
